Oral and maxillofacial surgery is a surgical specialty that treats diseases, injuries, and defects of the head, neck, face, jaws, and oral cavity. It is a diverse field that encompasses a wide range of procedures, from simple tooth extractions to complex reconstructive surgeries.

Oral and maxillofacial surgeons are highly trained and skilled professionals who have completed a residency in oral and maxillofacial surgery. They are experts in the anatomy and physiology of the head and neck, and they are able to perform a variety of surgical procedures safely and effectively.

Some of the most common procedures performed by oral and maxillofacial surgeons include:

- Tooth extractions

- Dental implants
- Jaw surgery
- Facial trauma surgery
- Oral cancer surgery
- Reconstructive surgery

Oral and maxillofacial surgery is a vital part of the healthcare system. It provides patients with the care they need to restore their oral health and function. If you are experiencing any problems with your head, neck, face, jaws, or oral cavity, please see your dentist or oral and maxillofacial surgeon for an evaluation.
